DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Publication of Training and Employment Guidance Letter No. 11-07, Change 2

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of publication.

SUMMARY: The Department of Labor's (DOL) Employment and Training Administration (ETA) is publishing Training and Employment Guidance Letter (TEGL) No. 11-07, Change 2, which rescinds TEGL No. 11-07, Change 1. The 2008 Final Rule implementing the H-2A Temporary Agricultural Worker Program, 73 FR 77109, Dec. 18, 2008 mirrors the clarification guidance of TEGL 11-07, Change 1, making the TEGL unnecessary and redundant.

DATES: This Notice of Publication is effective September 21, 2009.

FOR FURTHER INFORMATION CONTACT: For information on the H-2A labor certification process governed by this publication, contact William L. Carlson, Administrator, Office of Foreign Labor Certification, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room C-4312, Washington, DC 20210. Telephone: (202) 693-3010 (this is not a toll-free number). Individuals with hearing or speech impairments may access the telephone via TTY by calling the toll-free Federal Information Relay Service at 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

Background

On November 14, 2007, the Department published TEGL No. 11-07, Change 1 that provided additional guidance to the State Workforce Agencies (SWAs) and ETA National Processing Centers (NPCs) involved in the processing of H-2A labor certification applications for temporary agricultural employment of foreign workers in the United States. Specifically, the clarifications provided direction to employer application filing, recruitment and housing standards.

Need for Rescission

On December 18, 2008 the Department published in the **Federal Register** final regulations that re-engineered the H-2A temporary agricultural workers program. These regulations went into effect on January 17, 2009. The regulations fully address employers' obligations with respect to

applications, recruitment, and housing standards making TEGL 11-07, Change 1 redundant and unnecessary. In addition, the re-engineering of the H-2A program revised the role of both the NPC and the SWAs, making portions of the TEGL inaccurate. The Department no longer requires the guidance provided in TEGL No. 11-07, Change 1 and is rescinding TEGL 11-07, Change 1.

Signed in Washington, DC this 26th day of August, 2009.

Jane Oates,

Assistant Secretary, Employment and Training Administration.

NUCLEAR REGULATORY COMMISSION

[NRC-2009-0413]

Draft Regulatory Guide: Issuance, Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Issuance and Availability of Draft Regulatory Guide, DG-1225.

FOR FURTHER INFORMATION CONTACT: Jerome Bettle, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: (301) 415-1314 or e-mail to Jerome.Bettle@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series

was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), titled, "Instrument Lines Penetrating the Primary Reactor Containment," is temporarily identified by its task number, DG-1225, which should be mentioned in all related correspondence. DG-1225 is proposed Revision 1 of Regulatory Guide 1.11, dated March 1971.

General Design Criterion (GDC) 55, "Reactor Coolant Pressure Boundary Penetrating Containment," and GDC 56, "Primary Containment Isolation," of Appendix A, "General Design Criteria for Nuclear Power Plants," to Title 10, Part 50, "Domestic Licensing of Production and Utilization Facilities," of the *Code of Federal Regulations* (10 CFR Part 50) require, in part, that each line that penetrates the primary reactor containment and that is part of the reactor coolant pressure boundary or connects directly to the containment atmosphere has at least one locked, closed isolation valve or one automatic valve inside and one automatic valve outside containment "unless it can be demonstrated that the containment isolation provisions for a specific class of lines, such as instrument lines, are acceptable on some other defined basis." This guide defines a basis that the staff of the NRC considers acceptable to implement GDC 55 and 56 with regard to instrument lines. This guide applies to all types of nuclear power plants.

II. Further Information

The NRC staff is soliciting comments on DG-1225. Comments may be accompanied by relevant information or supporting data and should mention DG-1225 in the subject line. Comments submitted in writing or in electronic form will be made available to the public in their entirety through the NRC's Agencywide Documents Access and Management System (ADAMS).

Personal information will not be removed from your comments. You may submit comments by any of the following methods:

1. *Mail comments to:* Rulemaking and Directives Branch, MS TWB 05 B01M, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.
